After the tragic death of John Amesbury, his prostrated wife, one of America's greatest beauties, dies. At her death Prof. Stilliter, an agent of the interests, kidnaps the beautiful three-year-old baby girl and brings her up in a paradise where she sees no man, but thinks she is taught by angels, who instruct her for her mission to reform the world. At the age of eighteen she is suddenly thrust into the world where agents of the interests are ready to pretend to find her. The one to feel the loss of the little Amiesbury girl most, after she had been spirited away by the interests. Was Tommy Barciay.

Fifteen years later. Tommy goes to the Adirondacks. The interests are responsible for this trip. By accident he is the first to meet the little Amiesbury girl, as she coines forth from her paradise as Celestia, the girl from hayen. Neither Tommy or Celestia recognize, each other. Tommy finds it an easy matter to rescue Celestia from Prof. Stilliter and they hide in the mountains, later they are pursued by Stilliter and eacape to an island where they spend the night.

A man of iron nerves and of great imagination under perfect control, Prof. Stilliter had but one weakness—his eyes. Otherwise he was as strong as a bull; but let him once begin to think about his eyes and he became the prey of fearful and wild fancies.

Most men die but once. Prof. Stilliter had died a thousand deaths and all of them violent and horrible, and due to a sudden loss of sight. During the preceding night, lying miserably on the hard, rooty ground, he had a most unpleasant nightmare about himself. He was alone in the midst of a vast, trackless forest. He was there on scient... c business—to record the song of a certain very rare bird. But the bird wouldn't sing. It would only laugh. It make a noise like two little children laughing. And it wouldn't show itself. He had followed it half the day. Once he had had a heavy fall and had broken his spare glasses all to smithereens, and nurt his side quite badly into the bargain. Suddenly he heard a sound that gave him fresh terrors—many sounds, the sounds of many soft-padded feet converging upon him from three sides over the dead leaves. Closer and clos-er they came, very slowly, and Stilliter howled back and he leaped to his feet and ran.
Thorns tore his clothes from his

All at once the ground became firm and even under his flying feet; he no longer encountered trees or bushes. He had escaped from the forest and from the thing that howled. There was still hope for him. He might still live to be the greatest man that had ever lived in the world. And then the next step that he took his foot never touched the ground at all; it just went down and down and head over heels he followed and fell through space.

"and walk naked until he reaches the
outskirts of Four Corners. Then he'll
hide in a bush and call piteously for help. I wish I could be there to see. The scene should have in it the true ssence of comedy."
Stilliter had no beliefs that could not

be ratified in a scientific way, but he could not altogether explain away the miraculous coincidence of Tommy being the very first person that Celestia hould meet.
"Why pick out to meet her when she

comes back, from all the millions who might be the first to meet her, the one person who was unhappy when she was taken away? Well, they won't do any more meeting, if I can help it.
